

TECHNICAL AID DEVICES

ZYPREX VISCOELASTIC GEL

- **Effective:** reduces and/or relieves pressure to therapy areas subject to risk and therapy localisations.
- **Safe:** optional protection based on requirements.
- **User-friendly:** can be adapted to various body types and environments.

- Complete heel pressure relief.
- Orthopaedic alignment of lower limbs.
- Detainment of the foot in a horizontal position and the allowance of foot flexing (100%) to prevent equinism.
- Slight inclination of the leg to promote venous return.

FOOT LIFT SPLINT

Non-slip Promust Silicone and PU/ PVC cover.

SINGLE PATIENT MINI-HEEL SUPPORT

- Complete heel pressure relief.
- User-friendly (easy to use).
- Very compact.
- "Single patient" use.

GELSCAR HEEL SUPPORT

- Reduces pressure placed on heel.
- Reduces the risk of skin abrasions.
- Limits the risk of skin over-heating owing to "rubbing".

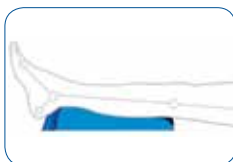

HEEL STABILISER

- Viscoelastic Foam.
- Product supplied with its own cover.
- Light and very compact.
- Single patient or multi-patient use.

LARGE HEEL SUPPORT

- Allows for pressure relief of the heel area according to the physiological axis of lower limbs.

BOTTOM OF THE BED HEEL SUPPORT

- Allows for pressure relief of the heel area according to the physiological axis of lower limbs.

DECUBITUS WEDGE

- For 30 ° sustainable lateral bending positioning.
