

GEL AND FOAM CUSHIONS: **GELSCAR, GELTOP ERGOMIX**

CUSHION MADE OF VISCOELASTIC GEL COMBINED OR NOT COMBINED WITH A HIGHLY RESILIENT FOAM BASE.

- **Efficiency:** reduces cutting forces applied to skin thanks to the viscofluid gel properties.
- **Safety:** stabilisation principle of the cushion.

GELSCAR CUSHIONS

- Reduction of cutting forces applied to skin thanks to the viscofluid gel properties.
- Reduction of maximum pressures.
- Seat secured by 4 cords stitched to the 4 corners.
- Insulation due to the properties of the cellular neoprene cover.
- The gel may provide a sensation of coolness upon initial contact: the neoprene cover helps to lessen this.

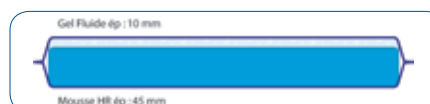

GELTOP CUSHION

For at home: delivered with 2 covers.
For common use: delivered with 1 cover.

- Reduction of maximum pressures by immersing the body in a fluid gel supported by highly resilient foam.
- Thermoregulation through the permeability of the protection with water vapour.
- Reduction of cutting forces applied to skin thanks to the viscofluid gel properties.

ERGOMIX CUSHION

- Combination of Zyprex foam and viscofluid gel under the ischiatic region.
- Reduction of "sliding forwards" with an adjustable pelvic stop.

TECHNICAL CHARACTERISTICS

PRODUCT NAME	REFERENCE	SIZES	PATIENT WEIGHT	FIRE STANDARDS
GELSCAR for a chair with a seat 38/42 wide and 39/42 deep.	VGLS01C	40 x 40 x 3.5 cm	40 to 100 kg	EN 591-I and 2
